PROFESSIONAL STYLER

NEW SENSATIONS FOR YOUR HAIR
NUEVAS SENSACIONES PARA TU PELO

 SALÓN SELECCIÓN

THER **A** P Y

Introducing Therapy by Salon Selección, one of the fastest heating hair straighteners on the market which combines cutting-edge technology with maximum efficiency.

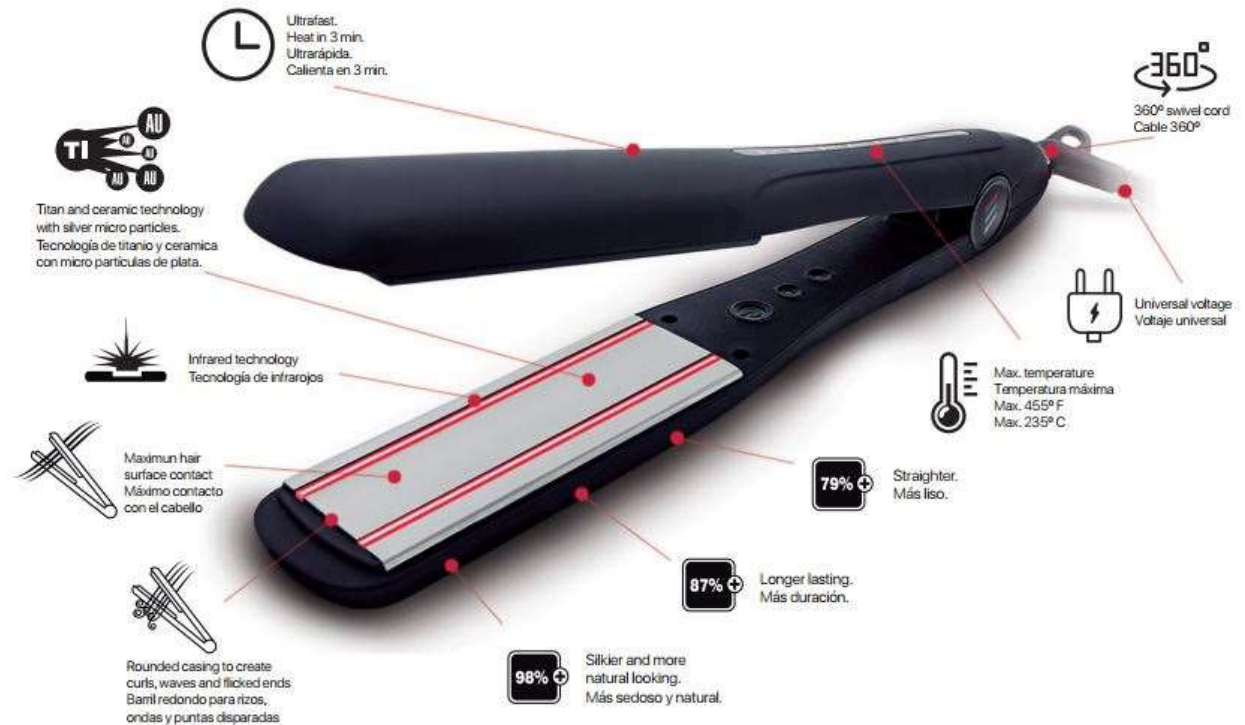

Therapy also offers infrared technology which cares for hair, even helping to repair it. The hair is heated from inside to outside which also helps seal split-ends. Heat is evenly distributed for faster, rapidly visible results and reduces the time the straightener is in contact with the hair.

Therapy; new sensations for your hair.

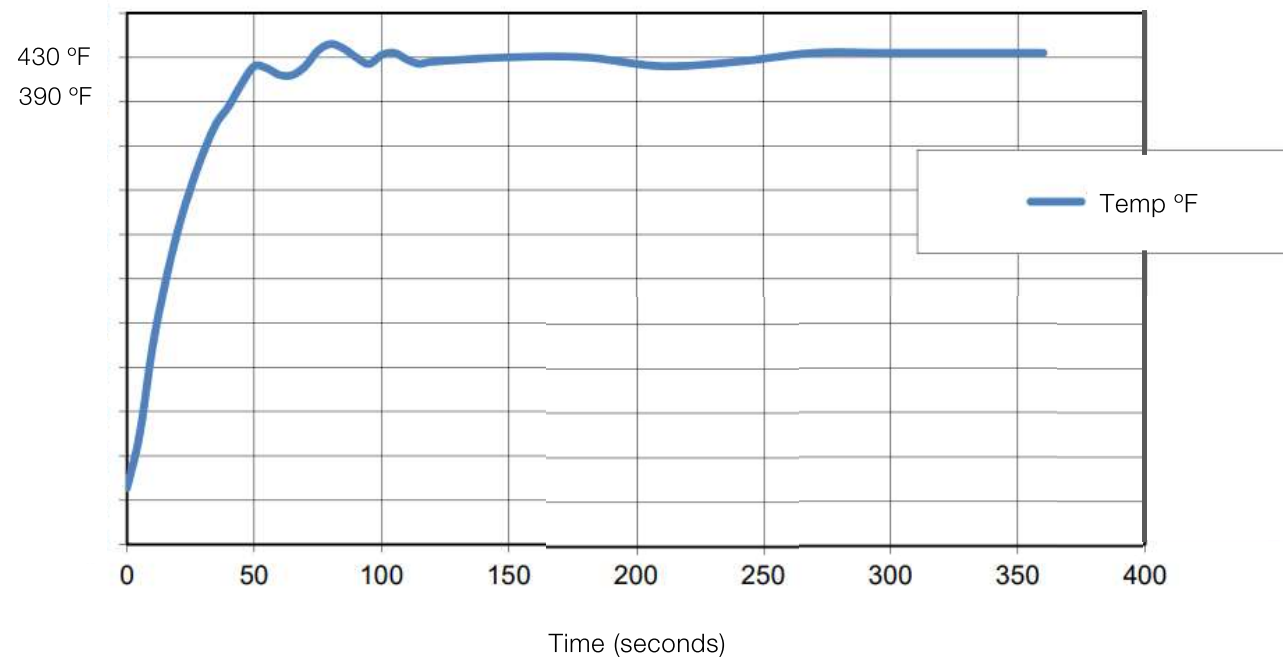

FEA TURES

- Ultra-fast heat-up.
 - Ready for use in just 30 seconds
 - 392 °F in 46 seconds
 - Reaches max. temperature in just 80 seconds
- Digital LCD – easy-to-read even in dimly lit conditions
- Adjustable digital temperature control from 266 to 446 °F
- Plates that combine titanium, ceramic and infrared technology
- Automatic shut-off
- Ultra-fast PTC heater
- 6-foot power cord, with 360° rotation
- Ergonomic design
- Rounded-edge plates, ideal for creating curls and waves

ULTRAF^AST

Therapy is one of the hair straighteners on the market to reach its maximum and optimal temperature fastest. Its maximum temperature of 446 °F is reached in 80 seconds, but in just 30 seconds it reaches 320 °F, the temperature when work can begin on hair, and 392 °F (optimal temperature) in 46 seconds.

TECHNOLOGY

Exclusive plate technology that combines Ceramic, Infrared, Titanium and a new PTC resistor, which allows the desired temperature to be reached quicker than conventional hair straightening irons, without compromising the durability of the appliance.

Ceramic	Infrared	Titanium
<ul style="list-style-type: none">• Material with a low friction coefficient (less damage to hair).• High durability and good heat conduction.• Prevents frizz.	<ul style="list-style-type: none">• Deep hair penetration without damage.• Helps repair hair and split-ends.• Improves feel and shine.	<ul style="list-style-type: none">• Highly resistant.• Light.• Uniform heat distribution.• Pin-straight finish.

Therapy's new PTC resistor reduces heat-up time when compared to conventional NTC resistors. PTC resistors are more durable and less easily damaged which means your hair straighteners will last you even longer.

WARNINGS

- Because it is an electrical appliance, THERAPY's plates reach high temperatures and heat can be transferred to the casing.
- Never use the hair straightener over a sink, near water or on wet hair.
- Never touch the plates when hot. Be careful to avoid touching the plate's edges when handling the hair straightener.
- This hair straightener is not suitable for use by children under 16, unless under adult supervision.
- This hair straightener is not suitable for use by people with physical, sensorial or psychological impairments. Nor should it be used by people without the appropriate experience or anyone unaware of its correct usage.
- Be careful when using sprays near the hair straightener. Never spray liquids directly onto the iron.
- Always check your THERAPY before use. If the iron, cable or plug are damaged, do not use.
