Presentation

Applications

- **Description**  
Body cream with a prebiotic, hydrating and repairing action.
- **Effect**  
A moisturizing and repairing body cream with a soothing effect and non-oily texture.
- **Properties**  
Formula based on Aloe Vera containing a combination of prebiotics and active 24-hour moisturizers, to restore the skin's well-being and natural balance. Developed with the aim of combating the discomfort, dryness and dehydration characteristic of skins with a weakened cutaneous barrier, especially during periods when the skin is affected by extreme conditions and/or stress.  
  
Its light texture is quickly absorbed, leaving the skin feeling soft and flexible. Restores and regenerates the skin, providing nourishment and firmness.
- **Key components**  
**Bio-algae.** This prebiotic compound, with significant nutritional properties (Superfood), has been shown through external studies to have the capacity, not only to boost microbiome balance (prebiotic effect), but also stimulate regeneration of the skin's epidermal cells to produce a revitalizing and rejuvenating effect.  
**Inulin and yoghurt dust.** Combines the nutritional benefits of yoghurt with the prebiotic activity of, the already well known, inulin, a polysaccharide of plant origin.  
**Hydraskin 24** A super-hydrating complex with a double, short and long-term action, that combines different moisturizing actives (like Hyaluronic Acid and NMF components) to prevent skin dryness and produce a 72-hour comfort sensation.  
**Aloe Vera:** The range is formulated with an Aloe Vera concentrate, to obtain maximum soothing and antioxidant results as well as effective hydration.  
**Avenanthramide:** known as the main calming active of oats, its aim is to reduce the itching, discomfort and redness of sensitive skin.  
**Bisabolol:** active obtained from chamomile. Known for its soothing and anti-inflammatory effects.
- **How to use**  
Apply then massage gently until fully absorbed.

- **Sales arguments**

A moisturizing and repairing body cream with a soothing effect and non-oily texture.  
Formula based on Aloe Vera containing a combination of prebiotics and active 24-hour moisturizers, to restore the skin's well-being and natural balance.
