Presentation

Applications

- **Description**

Dual action *Prebiotic enzymatic scrub*. Suitable for all skins types even sensitive skin.

- **Effect**

Prebiotic enzymatic scrub which combines physical exfoliation with biodegradable cellulose particles, and bio-enzymatic exfoliation which imitates natural skin renewal.

- **Properties**

An essential product for our facial hygiene ritual, the perfect complement to eliminate skin toxins. The result is completely clean skin, ready to absorb any posterior treatments.

- **The micro granules (*Physical exfoliation*) eliminate the most superficial impurities to illuminate the skin and recover youthfulness.**
- **The enzymatic exfoliation has a non-aggressive renewing action.**

This product is not photo-sensitive and can be used all year long.

We recommend applying sun protection while using this product.

- **Key components**

Biodegradable cellulose particles: fine granules perfect for gentle exfoliation.

Mucor Miehei Extract: Biological exfoliation, based on an enzyme derived from the *Mucor Miehei* fungus, which imitates the skin's natural process of renewal. In comparison to AHAs, it produces reduced levels of sensitivity and interference with the skin's barrier function.

Bio-algae. This prebiotic compound, with significant nutritional properties (Superfood), has been shown through external studies to have the capacity, not only to boost microbiome balance (prebiotic effect), but also stimulate regeneration of the skin's epidermal cells to produce a revitalizing and rejuvenating effect.

Inulin and yoghurt dust. Combines the benefits of yoghurt with the prebiotic activity of, the already well known, inulin, a polysaccharide of plant origin.

- **How to use**

Apply a small amount to clean, makeup-free, skin. Avoid the eye area. Then use fingertips or a facial brush to massage gently, paying special attention to the roughest areas. Rinse off with plenty of water.

- **Sales arguments**

Prebiotic enzymatic scrub which combines physical exfoliation with biodegradable cellulose particles, and bio-enzymatic exfoliation which imitates natural skin renewal, the perfect complement to eliminate skin impurities and toxins. The result is completely clean skin, ready to absorb any posterior treatments.

- The micro granules eliminate the most superficial impurities to illuminate the skin and recover youthfulness.
- The enzymatic exfoliation has a non-aggressive renewing action.

This product doesn't cause photo-sensitivity and can be used all year long.

We recommend applying sun protection while using this product. Suitable for all skin types, even sensitive skin.

Depending on the skin's exfoliation needs it can be used anything from once or twice per week to every fifteen days.
