**Presentation**

**Applications**

- **Description**

*Prebiotic Treatment Mask*, professional formula, suitable for all skin types.

- **Effect**

Prebiotic facial treatment mask with a moisturizing and repairing action, soothing effect and refreshing feel.

- **Properties**

Designed for professional use. Readies the skin for posterior treatments.

Offers an added prebiotic hydrating boost to the Essential Reload intensive treatment or any other specific treatment. Its formula makes it the ideal complement as it prepares the skin and facilitates the absorption of the actives contained in any facial treatment applied afterwards.

- **Key components**

**Bio-algae.** This prebiotic compound with significant nutritional properties (Superfood), has been shown through external studies to have the capacity, not only to boost microbiome balance (prebiotic effect), but also stimulate regeneration of the skin's epidermal cells to produce a revitalizing and rejuvenating effect.

**Inulin and yoghurt dust.** Combines the benefits of yoghurt with the prebiotic activity of, the already well known, inulin, a polysaccharide of plant origin.

**Hydraskin 24** A super-hydrating complex with a double, short and long-term action, that combines different moisturizing actives (like Hyaluronic Acid and NMF components) to prevent skin dryness and produce a 72-hour comfort sensation.

**Bisabolol:** active obtained from chamomile. Known for its soothing and anti-inflammatory effects.

**Avenanthramide:** known as the main calming active of oats, its aim is to reduce the itching, discomfort and redness of sensitive skin.

- **How to use**

Apply to face, neck and neckline, avoiding the eye contour after the cleansing and renovation phase of any treatment. Leave on for 10-15 minutes then remove any excess product before continuing with the specific treatment.

- **Sales arguments**

Facial mask for face, neck and neckline with a moisturizing and repairing action, soothing effect and refreshing feel. Designed for professional use. Readies the skin for posterior treatments. Offers an added prebiotic hydrating boost to the Essential Reload intensive treatment or any other specific treatment. Its formula makes it the ideal complement as it prepares the skin and facilitates the absorption of the actives contained in any facial treatment applied afterwards.
